

## light wall

### Petrosaudi

Imagine a wall of light...

A wall almost cold to the touch, with totally even illumination and a brightness that could make it a primary light source.

Now add your company branding and a TV screen for promotional images and video.

...That's what I call a welcoming, modern reception.

Designed and manufactured in the UK our LED light panel is the perfect solution; with over 40,000 hours life, low power consumption and seamless illumination using ultra powerful LEDs, the light wall will become the focal point of your reception or company boardroom.

For the Petrosaudi reception wall we used a white LED lightpanel behind glass with an integral TV screen, all surrounded by an Aluminium frame; rather smart don't you think.
