

# tension fabric lightbox

## LED ILLUMINATION

Our ultra thin fabric faced light boxes are 24mm deep. Also available in depths of 65mm and 100mm.

The graphic is printed onto stretch fabric and secured in position by a stitched push in silicon strip, ideal for quick and easy replacement.

LED illumination using our UK manufactured energy efficient LED light panel technology or our hybrid, both virtually maintenance free.

Ideal for retail environments where high impact, easy to change, cost effective graphics are of major importance.
